

# Omar Eldeeb

Full-Stack Developer | Alexandria, Egypt | [omareldeeb2003.dev@gmail.com](mailto:omareldeeb2003.dev@gmail.com) | +20 115 550 2429 | [LinkedIn](#) | [GitHub](#)

## Profile Summary

Backend-focused Full-Stack Developer with hands-on experience building secure REST APIs, and AI-integrated applications using Python and Node.js/TypeScript. Skilled in JWT authentication, caching, Docker and both SQL & NoSQL databases. Experienced integrating LLM-powered workflows. Focused on building automation systems and developer tools that integrate AI workflows to enhance team productivity.

## Education

University of Arab Academy of Sciences, Technology and Maritime Transport Oct 2022 – July 2026  
B.Sc.in Software Engineering (Computer Science)

## Projects

Heritage Hub–Cultural Tourism Platform(Graduation Project) [GitHub](#) Oct 2025 – Present

- Tech Stack: React Native(expo), Node.js, PostgreSQL(JSONB), ORM , OAuth, GraphQL , FastAPI (Python).
- Built a cross-platform bilingual app using Feature-Sliced architecture, integrating a FastAPI-powered AI chatbot service and multi-environment (Dev/Staging/Prod) deployment configuration.
- Engineered 40+ REST API endpoints across 6 core modules with production-grade JWT auth — rotating refresh tokens with reuse detection via token family strategy and revocation at the refresh layer
- Designed a PostgreSQL schema using JSONB columns for bilingual (AR/EN) content storage, ORM-optimized queries, and cursor-based pagination across all list endpoints for scalable read performance

MediLink – Full-Stack Healthcare Platform [GitLab](#) Feb 2026 – May 2026

- Tech Stack: Expo, Node.js, MongoDB, LangChain ,Computer Vision Model, Claude API, Docker
- Built 7 secure REST API endpoints covering auth, hospital and pharmacy directory, AI chat, and X-ray analysis
- Engineered a LangChain-powered multimodal AI pipeline connecting a computer vision model with an Claude API (Anthropic) enabling X-ray analysis and intelligent chat from a single abstracted service layer
- Containerized the full backend with Docker Compose for consistent, production-ready deployment

Complaint Management System – Full-Stack MERN Project (DEPI) [GitHub](#) Mar 2025 – May 2025

- Tech Stack: React, Redux,Express.ts, MongoDB, JWT ,rate-limiter, redis, nodemailer.
- Built a secure JWT + HttpOnly cookies authentication(RBAC), rate-limited APIs, and complete complaint CRUD with categorized statuses and admin dashboard management.
- Applied TDD methodology using Jest + Supertest for full API coverage; used Redis for session caching and rate-limit tracking

## Skills

**Backend:** Node.js, Express.js, Nest.js, TypeScript, Python(FastAPI, async) .

**Problem solving:** Solved 100+ challenges on LeetCode( DSA and patterns ).

**Testing:** pytest, Jest, Supertest, TDD methodology.

**Frontend:** React.js/TS, React Native, Tailwind CSS , Material UI.

**Databases:** PostgreSQL, MySQL, MongoDB, Redis (caching).

**DevOps:** Docker, GitHub Actions CI/CD, Linux, Nginx.

**AI / LLM:** LLM API integration, n8n automation.

**Principles:** SOLID, Design Patterns, Microservices , MVC .

## Certifications

Node.js, Express, MongoDB and More: Udemy

Generative AI for Everyone:Coursera, DeepLearning.AI

McKinsey Forward Program: McKinsey & Company

Test-Driven Development for JavaScript: Coursera

Cloud Services Management and Operation: NTI

React Front-End Web Developer: DEPI
